

# CP 35508 Operating Guidelines

(2816 and other assembled versions)

## Introduction

Thank you for your purchase of the CP 35508 Water Tender from Milepost 93 Models! Here are a few operating guidelines to ensure you get the most of your model.

## Unboxing

- Carefully remove the model from the box. **PARTS ARE DELICATE!** Always handle by the sides or trucks, never by any of the detail parts!

## Setup and Breakin

- First, check to ensure that the trucks rotate freely.
- Check to ensure the wheels rotate. If necessary, use a small screwdriver to press the pickups down to ease resistance
- Check that the coupler height is correct and replace as necessary
- Take the car on several trips around an oval, in both directions

## Operation

- CP 35508 always operates as the last tender in a consist, and always operates with the internal headlight facing the back.
- To turn the headlamp on and off in Non-DCC models, wave a magnet over the rear access hatch (The round one)
- For DCC equipped models, the default address is 3 and the default function to turn the light on is F0 (Non directional). This can be customized

## Maintenance

- Keep the ends of the axles (where they meet the truck sideframe) lubricated with a tiny drop each. Also, lubricate the truck bolsters as necessary. Clean the pickups as necessary with a track cleaning agent (avoid acetone and other plastic-attacking agents, as it may damage the model)

## Safety Instructions

Do not attempt to service any of the internal electronics. DCC conversion instructions for non-DCC equipped models can be found on our website. Metal parts may be sharp, so handle with care.

## Warranty and Contact information

This product is warranted for life for the fabricated (plastic and metal) parts so long as we maintain stock for any replacements, and for electronics, the warranty is for three years. Warranty time for

addons (such as ESU decoders) is subject to that company's warranty service and should be handled by them.

Instructions for our models and ways to contact us for questions and warranty service are available on our website:
